

We build tools and programs for your cause.

TESA (The Toolbox for Education and Social Action) works with organizations to build educational tools, resources, and programs that are participatory and based in social justice principles.

Curriculum and tool creation

TESA can collaborate with you to develop an entire educational project from start to finish, no matter how big or small.

Overhauling and development

Is your educational programming lacking? We are experts in upgrading existing curriculum and tools.

Game creation

TESA has designed and published three board games. We also work with clients to help them create their own games, for organizational trainings or mass distribution.

Train-the-Trainers

We can train your staff or leaders to implement social justice and participatory education on their own.

Workshop creation and facilitation

TESA can design and facilitate content to meet your goals.

Online courses and tools

We've worked with organizations to bring participatory and social justice education online, reaching broader audiences.

Education and development services for cooperatives

TESA has collaborated to launch dozens of cooperatives and cooperative education initiatives.

Ongoing education coaching and support

Keep TESA on retainer for regular support in the development of your education projects.

“When it comes to curricula and workshop development, we trust that TESA will do a great job in working with us to come up with fun, interactive, and thought-provoking activities that are engaging for everyone who takes part.”
